EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The status identifier for claim 1 was changed from "amended" to --currently amended--.

On page 1 of the specification in the section entitled "Cross-Reference to Prior Application", the word "pending" was deleted, the phrase --, now US Patent no. 6,521,182, issued on February 18, 2003--was inserted after the phrase "Application 09/333,765, filed June 15, 1999", and the phrase --, now US Patent no. 6,084,660, issued on July 4, 2000--was inserted after the phrase "09/354,995, filed July 16, 1999" in order to update the status of these applications.

2. The following is an examiner's statement of reasons for allowance: Application serial no. 09/541,376 is being allowed since none of the prior art of record teaches or fairly suggests the use of two stop junctions in a capillary medical diagnostic device, wherein one of the stop junctions in a bypass channel is triangular in shape with two legs that define an angle of less than 90 degrees that points toward the main capillary channel of the device, and is weaker in comparison to the other stop junction located within a measurement channel of the device, so that excess sample will flow through the second triangular stop junction into an overflow region only after a measurement area in the measurement channel has been filled without any pressure generated externally of the medical device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
